# Invite you to attend the following

# Feline Webinar

## Tuesday June 18, 2013

**TIME:** 7:30 pm (AEST)

**SPEAKER:** [redacted]

**TOPIC: Feline Alimentary lymphoma: The good, the bad & the ugly**

Alimentary lymphoma is one of the most commonly diagnosed neoplasms of the cat. Despite the common prevalence of this disease, appropriate diagnosis and treatment can be challenging. Accurate diagnosis of the distinct subtypes of alimentary lymphoma is important, as there are major differences between them in terms of clinical presentation, treatment and prognosis. Additionally, it can be difficult to distinguish low grade alimentary lymphoma from chronic inflammatory conditions of the gastrointestinal tract.
