Good morning Ellaine,

Again I must apologise for the minimal communication with you. I have been very sick with a chest infection and have been off work since Wed last week. I wanted to let you know that I have reviewed the YouTube video links you sent us and I am very keen to discuss the proposal and explore the possible partnership between Royal Canin and Murdoch University's Veterinary College.

I will be in touch next week.

Thank you Ellaine!

Best Regards,

[redacted]

Hi [redacted]

I know how things can be when the insanely busy times hit. Of course, next week will be fine.

I am very glad to hear you are keen to progress in some way, and I'm happy to provide any further information you require. Just let me know.

Kind regards

Ellaine

Hello Ellaine,

I am terribly sorry for not getting back to you sooner! It has become insanely busy this past month, but we haven't forgotten the proposal. We are still very keen to progress with plans etc but need a little more time. Would it be possible to provide feedback/answer by next week?

Best regards,

[redacted]

Hi [redacted]

I hope this finds you well.

Just a quick catch up to check if you and your colleagues have been able to discuss and consider the Clinical Skills Centre proposal.

I look forward to hearing from you.

Kind regards

Thank you Ellaine,

We also really appreciated your time on Tuesday! We will go through the material you have forwarded on to us and get back to you within the next two weeks.

Enjoy your weekend!

Kind Regards,

[redacted]

Hi [redacted]

Thank you for calling this morning. It was lovely to chat to both you and Michelle. It was very helpful to get more of an idea regarding the areas of importance for Royal Canin.

Further to our discussion, please find attached Mark Lawrie's presentation that you mentioned. He is happy for me to share this with you and [redacted], but asks that it not be further distributed.

I have also sourced some links to video's from other veterinary colleges that highlight their clinical skills centre. They will give you an idea of how such centres can look and be utilised. Obviously they are not necessarily indicative of what ours will ultimately include or look like. I hope they give you an idea of how useful models, materials and instructors are in aiding students in developing a broad range of skills and dexterities at their own rate.

I look forward to receiving further information from you regarding possible nutrition modules. Once I have that information I will liaise with the appropriate staff to discuss how these could be implemented into our curriculum.

We really appreciate your consideration of support for this project. If you have any further queries, or would like anything clarified after our discussion this morning, please don't hesitate to contact me.

Kind regards
