## The Senate Office says:

The best submissions:

- clearly address some or all of the terms of reference—you do not need to address each one
- are relevant and highlight your own perspective
- are concise, generally no longer than four to five pages
- begin with a short introduction about yourself or the organisation you represent
- emphasise the key points so that they are clear

- outline not only what the issues are but how problems can be addressed, as the committee looks to submissions for ideas to make recommendations
- only include documents that directly relate to your key points
- only include information you would be happy to see published on the internet.

Submissions that include complex argument, personal details or criticise someone may take the committee longer to process and consider.

\*\*\*\*\*Beware, this Inquiry is intended to find out the bad things about processed pet foods. From your own experiences you can tell about unsatisfactory outcomes without needing to say that the manufacturers and vets are criminals/crooks/fraudsters.

Talk about your experiences and the Committee will get the message. Also there will be a better chance of your submission being accepted and published for all the world to see.
